- Python
- Java
- JavaScript
- HTML

- CSS
- Kotlin
- TypeScript
- React.js

- Git
- Django
- Mobile Development
- Web Development

- Machine Learning
- Object Oriented Programing

Projects

Portfolio Website
- Designed and implemented a website to display projects and personal information using **JavaScript**, **CSS**, and **HTML**
- Ensured the website is **accessible** using aria labels, tab tags, etc. and mobile-friendly using **media-queries**.
- Hosted the website using GitHub pages.
- The portfolio can be found at jbrijs.github.io**.**

Command Line Fractal Generator
- Refactored a sloppy code base using **Git** for version control, object-oriented programing principles, and coding best practices to make the program modular, scalable, and intuitive.
- Implemented the program using **Python**, used the **TKinter** library to display the fractals; the program takes arguments via the command line.
- Designed the program to be highly interactive and allow uses to choose and/or upload their own fractal and color palette configurations.

Mobile-friendly Quote Application
- Created a mobile-friendly and accessible web app that allows users to search for and pin quotes.
- Integrated with a quote API to fetch quotes from famous people throughout history.
- Designed the website using **HTML** and **CSS** and utilized **TypeScript** to add functionality.

Work Experience

In N Out Burger   Logan, UT
Associate and Clean-up Crew member   June 2022 - Present
- Served high quality, fresh, and affordable food to the greater Cache Valley area with exceptional customer service.
- Assisted with all cooking, prep, and serving roles in a fast-paced environment while following food safety protocols and fostering a positive attitude.
- Maintained the cleanliness of the restaurant by performing all cleaning duties starting at 5am until open.
